

SERVICES CATALOGUE

ERP, eCommerce & enterprise systems, done right.

A specialised technology partner for NetSuite, SAP, Shopify, and Odoo — helping growing and enterprise businesses implement, integrate, and optimise their core systems.

NetSuite

SAP

Shopify

Odoo

WHO WE ARE

One partner, four platforms

ND Stack helps businesses get more out of their core systems — a cleaner, better-automated NetSuite ERP, a stable and well-administered SAP landscape, a faster Shopify storefront, or a tailored Odoo implementation. We combine deep functional knowledge with strong technical delivery, so the same team handles both the advice and the hands-on engineering — and we connect these platforms so your data flows seamlessly between them.

WHERE WE WORK

Serving clients across five countries

- United States
- United Kingdom
- Canada
- Australia
- New Zealand

WHY TEAMS CHOOSE US

Built around your business, not ours

✓ Functional + technical depth

Advisory and engineering under one roof — no hand-offs, no gaps between strategy and build.

✓ Risk-free start

A complimentary consultation and a free proof-of-concept so you can judge the work before committing.

✓ Cross-platform integration

We connect NetSuite, SAP, Shopify, and Odoo so orders, inventory, and data stay in sync.

✓ Time-zone aligned coverage

Availability across US, UK, Canada, Australia, and New Zealand business hours.

✓ Fast, reliable delivery

Quick turnaround with quality checks, clean documentation, and dependable support.

✓ Long-term partnership

We optimise for your growth, not a one-off ticket — most clients stay on for ongoing support.

NetSuite Services

Full-cycle NetSuite expertise — from requirement analysis and SuiteScript development to integrations, commerce, and ongoing optimisation.

Development & Customisation

Custom records, fields, forms, roles, and tailored functionality built around how your business actually operates.

SuiteScript (1.0 / 2.0 / 2.1)

User Event, Client, Scheduled and Map/Reduce scripts, Suitelets, RESTlets, and Workflow Action Scripts for custom logic.

Integrations (RESTlets, APIs & Middleware)

Connect NetSuite to external systems via RESTlets, SuiteTalk, and middleware such as Celigo, Boomi, and MuleSoft.

SuiteFlow Workflow Automation

Automated approvals, notifications, escalations, and compliance controls that replace manual, error-prone steps.

SuiteCommerce (SCA & SCS)

Theme and checkout development, CMS pages, responsive design, SEO, and performance tuning for NetSuite storefronts.

Reporting, Dashboards & Saved Searches

Custom KPIs, SuiteAnalytics, saved searches, and financial/operational dashboards for clear, real-time visibility.

Work Order & Manufacturing

Production planning, work orders, assemblies, and end-to-end manufacturing process implementation.

Warehouse (WMS) & Inventory Control

Stock transfers, cycle counts, adjustments, replenishment, and real-time inventory accuracy across locations.

Supply Chain & Order Fulfilment

Order processing, fulfilment, backorder handling, and exception workflows across every sales channel.

Custom Records, Fields & Advanced PDF

Tailored data structures plus polished, fully branded transaction and Advanced PDF/HTML templates.

Requirement Analysis & Solution Design

Requirement gathering, technical documentation, and end-to-end solution design before development starts.

Performance Optimisation & Troubleshooting

System-efficiency tuning, advanced debugging, and governance management to keep NetSuite fast and stable.

How we deliver: end-to-end project ownership • proactive problem solving • clear client communication • thorough documentation & knowledge transfer.

Selected NetSuite work

A snapshot of delivered NetSuite projects across integrations, commerce, automation, and platform engineering.

Shipping & Logistics Integrations

FedEx, UPS, and ShipStation integrations plus 3PL/WMS connections — automating real-time rate shopping, label generation, address validation, tracking sync, and fulfilment status across distribution centres.

eCommerce & Marketplace Integrations

Shopify-NetSuite and Amazon Seller Central integrations, SuiteCommerce Advanced (SCA) and SuiteCommerce (SCS) sites, and multi-channel commerce — syncing customers, products, pricing, inventory, orders, fulfilments, refunds, and settlements.

Finance & CRM Integrations

Sage, Salesforce, and HubSpot integrations with payment gateways (Stripe, PayPal, Authorize.Net) — keeping accounts, invoices, opportunities, payments, and reconciliations consistent across finance and sales teams.

Automation & Operations

Order management, inventory and warehouse automation, procurement/purchase-order workflows, and complex SuiteFlow business-process automation — reducing manual effort and exceptions.

Platform, Data & Integration Layer

Custom SuiteScript across all API types, REST API & middleware integrations (Celigo, Boomi, MuleSoft), EDI with trading partners, reporting & SuiteAnalytics, data migration & ERP implementation, and manufacturing/supply-chain solutions.

SAP Basis / HANA Services

Administration, monitoring, and support for SAP landscapes — keeping ECC, BW, S/4HANA, and HANA systems stable, secure, and high-performing.

System Administration & Monitoring

Day-to-day Basis administration with system, interface, and job monitoring plus event and notification management.

SAP HANA Administration

HANA database administration, revision upgrades, system replication (HSR), and performance optimisation.

User & Security Administration

User and role management, authorisations, and security compliance across the landscape.

Transport & Change Management

Transport Management System (TMS), client copies, and controlled change movement between systems.

Kernel, SPS & Notes Maintenance

SAP kernel maintenance, Support Package Stack (SPS) implementation, component upgrades, and SAP Notes.

High Availability & Disaster Recovery

HA/DR design and operations using HSR, SUSE HA, and Pacemaker for resilient, always-on systems.

Performance Management

EarlyWatch Alert (EWA), table/parameter optimisation, and SQL analysis to keep systems performing.

Solution Manager & Managed Systems

SolMan administration, managed-system configuration, LMDB, SLD, and Diagnostics Agents.

Focused Run & Cloud ALM

Advanced system, health, and integration monitoring, alerting, dashboards, and Cloud ALM setup & operations.

Backup, Recovery & System Refresh

Backup and recovery operations plus full system copies and refreshes for project and test landscapes.

Installation, Migration & Upgrade

New installations, system migrations, and version/component upgrades executed with minimal downtime.

Incident, Change & Problem Mgmt

ITIL-aligned incident, change, and problem management with reporting, documentation, and audit support.

Root Cause Analysis (RCA) and end-to-end monitoring across business processes — issues identified and resolved before they affect operations.

Selected SAP Basis / HANA work

Hands-on Basis and HANA delivery across enterprise landscapes in multiple regions.

Direct Energy

UNITED STATES · SAP BASIS / HANA CONSULTANT

Basis administration for production and non-production landscapes; kernel upgrades, support-pack implementations, and system refreshes; HANA administration, backup/recovery, and performance optimisation; monitoring via Solution Manager and Cloud ALM; incident, change, and problem management.

Siam City Cement

THAILAND · SAP BASIS / HANA CONSULTANT

Support across SAP ECC, BW, and HANA; system maintenance including kernel upgrades and patching; transports, client copies, and monitoring; HANA replication, backup, and recovery; coordination with global teams on planned maintenance.

Public Sector Project

GOVERNMENT · SAP BASIS ADMINISTRATOR

Support for critical public-sector SAP systems; user administration, security compliance, and monitoring; system refreshes, client copies, and transport management; high availability and business continuity; participation in audits and compliance activities.

Medline Industries

UNITED STATES · SENIOR SAP BASIS / HANA CONSULTANT

Large-scale SAP ERP and HANA landscapes; HANA performance tuning and troubleshooting; replication, disaster-recovery testing, and backup validation; SAP, support-pack, and kernel upgrades; monitoring via Solution Manager, Focused Run, and Cloud ALM.

Shopify Services

Conversion-focused storefronts, custom apps, and integrations that connect your store to the rest of your business.

Store Setup & Theme Development

Custom, responsive, conversion-focused storefronts that look the part and sell well.

Liquid & Frontend Customisation

Theme tailoring, UI/UX improvements, and bespoke storefront features.

Payment & Checkout Optimisation

Gateways, checkout extensibility, and a smoother path to purchase.

Performance & SEO

Speed, Core Web Vitals, and on-page SEO that lifts visibility and sales.

Custom App Development

Public and custom Shopify apps, extensions, and storefront integrations.

Shopify ↔ ERP Integration

Sync orders, inventory, pricing, and customers with NetSuite, SAP, or Odoo.

Migration to Shopify

Move from other platforms with full data integrity and zero surprises.

Ongoing Support

Maintenance, enhancements, and monitoring to keep the store healthy.

Odoo Services

End-to-end Odoo implementation, custom modules, and integrations across sales, inventory, accounting, and more.

Odoo Implementation

End-to-end setup across Sales, Inventory, Accounting, CRM, Manufacturing, and HR.

Custom Module Development

Tailored modules and business logic built in Python and XML.

Customisation

Views, workflows, reports, and access-rights tailored to your processes.

Integrations & API

Connect Odoo with Shopify, NetSuite, SAP, payments, and third-party tools.

Data Migration & Upgrades

Migrate from legacy systems and move safely between Odoo versions.

Website & eCommerce

Odoo website builder, online store, and customer portal setup.

Reports & Dashboards

QWeb reports and BI dashboards for clear, real-time visibility.

Support & AMC

Functional and technical support, plus annual maintenance contracts.

HOW WE WORK

Flexible engagement models

Choose the model that fits the work. Every engagement starts with a clear scope, so you always know what you are getting.

Hourly Support

Pay-as-you-go for ad-hoc work, customisations, and quick fixes — ideal for ongoing tweaks and small tasks.

Project-Based

Defined scope and milestones for implementations, migrations, and integrations with a clear delivery plan.

Dedicated Resource

A dedicated specialist or team for continuous development, administration, and support.

Start risk-free

- ✓ Complimentary consultation with a senior NetSuite, SAP, Shopify, or Odoo specialist
- ✓ A free proof-of-concept or demo task on real work
- ✓ Clear scope and estimate before any paid work begins
- ✓ Coverage aligned with US, UK, Canada, Australia & New Zealand business hours
